MEGA RACK POWER STRIP AND ONE-WRAP PLUS CABLE WRAPS

Your one-stop shop for power and cable management tools.

Key Features

- ▶ **Only 1U high, Mega Rack supports up to eight transformers. It includes surge protection and features a surge LED.**
- ▶ **Made from heavy-duty materials, One-Wrap Plus Cable Wraps help cables stay put.**

Why buy three racks when one Mega Rack Power Strip does the same job? Boasting the best price-per-outlet for a surge-protected power strip, Mega Rack fits a standard 19-inch (48.3-cm) data-center rack. It includes four outlets in the front and four outlets in the back.

Because each outlet is spaced 2.1 inches (5.3 cm) apart, you can install transformers side by side. Mega Rack is so efficient, you can even power up to eight devices from a single rack—without wasting space on empty outlets. Plus, Mega Rack is only 1U high, so it won't take up precious space. Surge protected,

Mega Rack includes its own surge LED for added peace of mind.

The 9-inch (22.9-cm) One-Wrap Plus Cable Wraps feature a reinforced metal mounting hold and sturdy cinch buckle. You can install them easily via a screw. Fully adjustable and reusable, they come in five colors, so you can easily color-code your cables.

Specifications

Cord Length: 15 ft. (4.6 m)

EMI/RFI Noise Protection: 20 dB
