

## Fax/Messaging Partner

The ultimate standalone integrated voice mail,  
fax, and fax-on-demand system.

## FEATURES

- Easy programming from your PC.
- Retrieve voice messages three ways: from the phone connected to the Partner, by calling in, or through your PC.
- Program the Partner to notify a pager each time a message or fax is received.
- Access eight voice mailboxes, one incoming fax box, and one Fax-On-Demand box.
- Easy-to-use Windows software included.

## OVERVIEW

Just because you're not in the office doesn't mean you have to be out of touch. The Fax/Messaging Partner delivers your messages and faxes whenever and wherever you want them.

The Fax/Messaging Partner is a multifunction, single-line dialup automated attendant for collecting or forwarding voice mail and faxes, and even offers fax-on-demand. Just connect it to an incoming phone line (or phone-system extension) and to your PC for programming. Once you've programmed the Partner, it's completely independent of the PC—it even works when the PC is off.

The Fax/Messaging Partner answers incoming calls with greetings. The caller can access eight voice mailboxes, one incoming fax mailbox, and one fax-on-demand box. Each voice mailbox has an individual greeting and will take a message or transfer the call to another phone number. You can also answer the phone attached to the Fax/Messaging Partner and then transfer it back to the Partner if the caller wants to leave a voice message or access Fax-On-Demand.

Retrieve voice messages remotely or use the phone attached to the Partner, or retrieve messages through your computer and forward them to other voice mailboxes. Each voice or fax box can also be programmed to notify a pager when time messages or faxes are received. The pager tells you where the message was received, the number of messages or pages received, the amount of storage left in the Partner, and the caller's ID.

## TECH SPECS

**Operating Requirements** — 286 or later, Windows 3.11 or 95, 8-MB RAM, 3-MB minimum hard-drive space

**Compatibility** — Phone: analog;  
Fax: ITU Group III, up to 14,400 bps

**Compliance** — FCC Part B; Power supply: UL, CSA

**Temperature Tolerance** — Storage: 32 to 122° F (0 to 50° C);  
Operating: 41 to 86° F (5 to 30° C)

**Relative Humidity** — 10 to 80%

**Power** — 120 VAC, 60 Hz, 12 VDC, 800 mA; Integrated rechargeable batteries provide up to 2 hours of communication time and 150 hours of standby time

**Size** — 1.5" H x 9" W x 6" D (3.8 x 22.9 x 15.2 cm)

**Weight** — 4 lb. (1.9 kg)

The Fax/Messaging Partner automatically detects and receives incoming faxes. Print stored faxes directly to the attached printer, retrieve them from a remote location (using a standard fax machine or a computer equipped with a fax modem), or forward them to another location and upload to your PC. Daisychain multiple Fax/Messaging Partners to allow multiple incoming fax lines to print faxes to a single printer.

Send faxes directly from any Windows program, and (if you have LAN in your office) the Partner will allow any computer on the network to send faxes. No need for separate phone lines and fax modems for each station!

Create Fax-On-Demand documents directly from Windows® applications by printing documents into the Fax/Messaging Partner. Each document can be voice-annotated. Or disable dialing out (forcing callers to call from their fax machines and pay phone charges) or block specific phone prefixes (such as 900 numbers).

The Fax/Messaging Partner, when connected between a PC and a printer, will automatically perform printer buffering (with up to 64 MB of storage) while performing all other functions.

Built-in chargeable batteries keep the Fax/Messaging Partner operational during power failures and provide up to two hours of talk time and 150 hours of standby time.

## WHAT'S INCLUDED

- ◆ Fax/Messaging Partner
- ◆ Printer cable
- ◆ Phone cable
- ◆ 120-volt power supply
- ◆ Software
- ◆ User's manual

## ADDITIONAL EQUIPMENT YOU MAY NEED

- RJ-11 (4-Wire) Modular Cable (EL04MS-007)
- DB9 Extension Cable with EMI/RFI Hoods (EDN12H-0010-MM)
- Parallel Printer Cable for Bidirectional Communications, Centronics® male (EYN600-0010-MM)
