

Enclosure Blower

**Maximum ventilation  
for your cabinets.**

## FEATURES

- » Cools cabinets by improving air circulation.
- » Draws cool air from the bottom of the cabinet and delivers it right across the front of servers or other network components.
- » Lowers the temperature of your cabinet's hot spots by up to 15 degrees F and protects your electronics against failure from overheating.
- » Optional Filter Assembly removes up to 80% of 2-micron particles from circulating air.
- » Requires only 2U of mounting space.
- » Fits on standard 19" rails.

## OVERVIEW

Many of today's network components—especially servers—run hot, making adequate cabinet ventilation a special concern. The [Enclosure Blower](#) from Black Box cools your cabinets by drawing cool air from the floor level and blowing it up through the front of the cabinet across server fronts. This high level of ventilation lowers the temperature of cabinet hot spots by up to 15 degrees F. Lowering temperatures protects your electronics against failure caused by overheating and enables you to install more servers.

The [Enclosure Blower](#) installs easily on the bottom of any cabinet with EIA-310 compliant 19" rails and takes only 2U of rack space. The blower works most effectively in cabinets with solid or partially vented front doors with rails set back at least four inches to establish a column of circulating air.

Add the easy-to-install Filter Assembly to help keep circulating air free of dust—the filter removes up to 80% of 2-micron particles.

Use the Dual Failover Switch to connect the [Enclosure Blower](#) into both a primary and a secondary power source. If the primary power source fails, it switches to the secondary power source automatically.

## TECH SPECS

**Fan Capacity** — 250 cfm

**Power** — 115 VAC, 60 Hz, 0.65 amp

**Size** — 4.31"H x 18.43"W x 28.45"D plus 6'6" power cord

**Weight** — 14 lb.

Item	Code
Enclosure Blower	RM801
Enclosure Blower Filter Assembly	RM802
Enclosure Blower Replacement Filters (12)	RM803

## Why Buy From Black Box? Exceptional Value. Exceptional Tech Support. Period.

### Recognize any of these situations?

- You wait more than 30 minutes to get through to a vendor's tech support.
- The so-called "tech" can't help you or gives you the wrong answer.
- You don't have a purchase order number and the tech refuses to help you.
- It's 9 p.m. and you need help, but your vendor's tech support line is closed.

According to a survey by *Data Communications* magazine, 90% of network managers surveyed say that getting the technical support they need is extremely important when choosing a vendor. But even though network managers pay anywhere from 10 to 20% of their overall purchase price for a basic service and support contract, the technical support and service they receive falls far short of their expectations—and certainly isn't worth what they paid.

At Black Box, we guarantee the best value and the best support. You can even consult our Technical Support Experts before you buy if you need help selecting just the right component for your application.

Don't waste time and money—call Black Box today.
